THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. ## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

***DETAILED ACTION***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory A. Hunt on February 09, 2009.

The application has been amended as follows:

***Claims:***

1. (Currently Amended) A method for performing stateful signaling transactions in a distributed processing environment, the method comprising:
  - (a) receiving a first signaling message;
  - (b) forwarding the first signaling message to a first stateful processing module of a plurality of stateful processing modules located in the same node;
  - (c) at the first stateful processing module:

- (i) generating a stateful transaction query message based on the first signaling message;
  - (ii) inserting an identifier in the stateful transaction query message for identifying the first stateful processing module; and
  - (iii) forwarding the stateful transaction query message to a destination; and
- (d) receiving a response to the stateful transaction query message, the response including the identifier; and
- (e) using the identifier to distribute the response to the first stateful processing module that originated the stateful transaction query message from among the plurality of stateful processing modules located in the same node; and wherein steps (a)-(e) are performed at a signal transfer point (STP).

14. (Currently Amended) A method for performing stateful signaling transactions in a distributed processing environment, the method comprising:

- (a) receiving a first signaling message;
- (b) forwarding the first signaling message to a first stateful processing module of a plurality of stateful processing modules;
- (c) at the first stateful processing module:
  - (i) generating a stateful transaction query message based on the first signaling message;
  - (ii) inserting an identifier in the stateful transaction query message for identifying the first stateful processing module; and

- (iii) forwarding the stateful transaction query message to a destination; and
- (d) receiving a response to the stateful transaction query message, the response including the identifier;
- (e) using the identifier to distribute the response to the first stateful processing module;
- (f) inserting stateful transaction location information in the stateful transaction query message;
- (g) extracting the stateful transaction location information from the response; and
- (h) using the stateful transaction location information to locate data associated with the stateful transaction; and wherein steps (a)-(h) are performed at a signal transfer point (STP).

16. (Canceled)

21. (Currently Amended) A telecommunications network element comprising:

- (a) a link interface module for receiving signaling messages and for forwarding predetermined signaling messages to one of a plurality of stateful processing modules located in the same node using a load sharing algorithm; and
- (b) each of the stateful processing modules being adapted configured to identify signaling messages received from the link interface module as stateful transaction trigger messages or stateful transaction response messages, and, in response to receiving a stateful transaction trigger message, each of the stateful processing modules being adapted configured to formulate a stateful transaction query message and to insert a stateful processing module identifier in the

Art Unit: 2416

query message for distribution of a response to a stateful transaction query message to the stateful processing module that originated the stateful transaction query message from among the plurality of stateful processing modules located in the same node; and wherein the link interface module and the stateful processing modules are components of a signal transfer point (STP).

24. The term “adapted” has been replaced with --configured--.

25. The term “adapted” has been replaced with --configured--.

26. The term “adapted” has been replaced with --configured--.

27. The term “adapted” has been replaced with --configured--.

28. The term “adapted” has been replaced with --configured--.

30. The term “adapted” has been replaced with --configured--.

31. (Canceled)

32. (Currently Amended) A telecommunications network element comprising:

(a) a link interface module for receiving signaling messages and for forwarding predetermined signaling messages to one of a plurality of stateful processing modules using a load sharing algorithm; and

(b) a plurality of stateful processing modules, each stateful processing module being adapted configured to identify signaling messages received from the link interface module as stateful transaction trigger messages or stateful transaction response messages, and, in response to receiving a stateful transaction trigger message, each stateful processing module is adapted configured to formulate a stateful transaction query message and to insert a stateful processing module identifier in the query message, wherein the stateful processing modules are each adapted configured to insert stateful transaction data location information in stateful transaction query messages, to extract the stateful transaction data location information from received stateful transaction response messages, and to use the stateful transaction data location information extracted from the response messages to locate data associated with each stateful transaction; and wherein the link interface module and the stateful processing modules are components of a signal transfer point (STP).

33. The term "adapted" has been replaced with --configured--.

34. (Currently Amended) A computer program product comprising computer executable instructions embodied in a computer readable medium for performing steps comprising:

- (a) receiving a signaling message;
- (b) determining whether the signaling message comprises a stateful transaction trigger message;
- (c) in response to determining that the signaling message comprises a stateful transaction trigger message, formulating a stateful transaction query message based on the stateful transaction trigger message;
- (d) inserting a stateful processing module identifier in the stateful transaction query message, the stateful processing module identifier identifying a stateful processing module that originates the stateful transaction query message from among a plurality of stateful processing modules located in the same node; and
- (e) sending the stateful transaction query message to a predetermined destination; and wherein steps (a)-(e) are performed at a single transfer point (STP).

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

Regarding Claims 1, 14 21, 32 and 34, prior art fails to show alone or in combination that the plurality of stateful processing modules, which perform stateful processes, locate in a signal transfer point (STP). It is noted that the closest prior art, Lindquist et al, U.S. Patent No.

5852660 discloses a STP being able to covert traffics between two different SS7 networks. However, Lindquist et al fail to disclose or render obvious the above limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
